The diagram illustrates the chemical structure of a poly(arylene ether). It features a central aromatic ring, denoted as 'R', which is part of a repeating unit. This ring is connected to two ether linkages, represented by '-O-' symbols. The side chains, indicated by wavy lines, are attached to the ether oxygens. The structure is shown in a vertical orientation, with various labels and chemical symbols indicating the components and their connectivity.

Figure 1 illustrates the experimental design. It shows a sequence of events: a subject is presented with a stimulus (a 3D object), then a response is recorded (a button press), and finally, the subject is rewarded (a coin is dispensed). The sequence is repeated for multiple trials.
